

Margaret Anne Wever

1943 ~ 2003

60 years

*Bubbly sense of humour ~ Kindness to the core
Laughter was her trademark ~ Who could ask for more
The laughter now is silenced ~ She left a great big space
She is suffering no longer ~ She's in a better place...*

Margaret was the first born of all my nieces and nephews, therefore taking a special spot in my heart.

She was a hard worker, raising four children. She was a very gifted person and whatever she did she did well. Some of her talents included cooking, sewing and her cottage craft was her life. She even held classes in her own home. My wife Peg and I always looked forward to her weekly visits with her sister every Thursday.

She put life into a room whenever she walked into it. She always had a joke to tell and her laughter filled the house.

However after several years of illness, she was diagnosed with Bowel Cancer and underwent chemotherapy but to no avail. She was taken from us on Saturday 17th May, 2003. To suffer no more.

I miss her, but her memories are constant by her hand-made crafts which adorn our home.

ALFRED JOHN STONE (Uncle)
